Paraffin Waxes

IGI 4630 Harmony Blend					Recommended: Single Pour Container Blend				
This single pour paraffin wax is specially formulated to make container candles. This wax exhibits much of the exceptional hot and cold throw of the 4627 Comfort Blend, only in slab form. Plus, it costs less!									
Melt point	Flash Point	Sample Size	Sample Price	Case Size	Case Price	Pallet Size	Pallet Price	Breaks	Price Breaks

IGI 4636 (J-50)					Recommended: Single Pour Container Blend				
Formerly known as Astorlie J-50, this paraffin wax is specially designed for making container candles. This wax is considered to be low shrink which means you only need to pour once in most applications.

IGI 4627 Comfort Blend					Recommended: Single Pour Container Blend				
A smooth, creamy, true single pour wax that is specially designed for the manufacture of container candles. This wax is so soft that rather than being cast into slabs, the 46 lb. case contains (2) plastic bags with 23 lbs. in each bag.									
Melt point	Flash Point	Sample Size	Sample Price	Case Size	Case Price	Pallet Size	Pallet Price	Breaks	Price Breaks

IGI 4633 Container Blend (J-223)					Recommended: Container Blend				
Soft and creamy, this low-shrink blend is designed specifically for container candles. This wax usually exhibits a bit better adhesion to glass jars than the IGI-4636 (formerly known as J-50) and also has slightly improved fragrance loading capacity. However, this wax might need a bit of a top-off on the 2nd pour.

IGI 4786 Container Blend					Recommended: Container Blend				
Soft and creamy, this low-shrink blend is designed specifically for container candles and has long been a favorite among seasoned candlemakers and, if used properly, should normally require only one pour.

Soy Waxes

Naturewax C-3 Soy Container Wax					Recommended: Soy Container Wax				
This 100% soybean wax is a true single pour, and is designed to make soy container candles. This wax produces a smooth finish on top and does not usually require touch ups. It also helps stabilize color for a nice uniform look. Comes in flakes!

Wicks

Wick Sampler Kits	Kit	Contents	# of Wicks	Price
<p>Here is a great way to test new sizes & types without breaking the bank! With such a large selection of wicks, it is often difficult to be sure which type, size, and length wick is best for your particular application. If you're unsure, we strongly recommend purchasing the Master Wick Sampler Kit. (total 300 wicks) Plus it's cheaper than buying the individual sampler kits separately!</p>	MASTER	5 of all cotton wicks	300	\$52.10

SPECIALTY WICKS	Size	Length	Price (Bag of 100)
<p>Paper core wicks burn very hot, which yields a large melt pool. Usually used only in large containers. The tealight wick below is designed specifically for our tealights.</p>	60-44-18 Paper Core	6"	\$8.10

ZINC CORE WICKS	Size	Length	Price (Bag of 100)
<p>These are the most commonly used wick type for many types of candles. They may also be used for votives, pillars, and in gel candles. The wire core in the wick helps the wick to remain standing straight while the candle is being poured and when a candle is lit. They have been widely used since the use of lead cored wicks was discontinued long ago. Each wick has been cut to the specified length, primed with a standard wax (180°F) and has been crimped with a 20mm diameter x 10mm tall tab.</p>	44-24-18	2.5"	\$8.10

CD SERIES WICKS	Size	Length	Price (Bag of 100)
<p>The CD series of wicks is a favorite among many seasoned candlemakers. These wicks are flat braided with a special paper filament woven around them. This configuration is engineered to promote maximum and consistent burn while ensuring a wick trimming flame posture. The CD series is used in many applications and is especially compatible with the harder-to-melt viscous waxes of both paraffin and vegetable base. Each wick has been cut to the specified length, primed with a high melt point wax (212°F) and has been crimped with a 20mm diameter x 10mm tall tab (except CD-22 which has a 20mm diameter x 6mm tab).</p>	CD-4	2.5"	\$9.30

ECO SERIES WICKS	Size	Length	Price (Bag of 100)
<p>This new series is designed specifically for natural waxes! The ECO series is a flat, coreless cotton wick braided with thin paper filaments interwoven for burn stability. This braiding technique also greatly improves rigidity compared to standard cotton and paper cored wicks. The specially treated paper threads provide a controlled curling of the wick making the ECO series self-trimming, which results in minimized mushrooming, soot and smoke. They have been designed to significantly reduce the "afterglow" and smoke often seen in paper cored wicks. An important difference to note is that these wicks have been primed with vegetable wax rather than paraffin wax, enabling you to market your candles as all natural candles!</p> <p>Each wick has been cut to the specified length, primed with a vegetable wax (161°F), and has been crimped with a 20mm diameter x 10mm tall tab.</p>	ECO-1	2.5"	\$9.30

HTP SERIES WICKS	Size	Length	Price (Bag of 100)
<p>Coreless, all cotton braided wicks which are designed to bend at the tip when burning, forcing the tip of the wick into the outermost portion of the flame where it burns hottest. Can be used in votives, pillars, containers, and gel candles. Each wick has been cut to the specified length, primed with a high melt point wax (212°F) and has been crimped with a 20mm diameter x 10mm tall tab (except HTP-1212 which has a 20mm diameter x 6mm tab).</p>	HTP-41	2.5"	\$8.10

LX SERIES WICKS	Size	Length	Price (Bag of 100)
<p>Flat braided cotton wicks, chemically treated with a high melt point wax (212°F). These wicks are designed to reduce "mushrooming" (build up of carbon at the tip of the wick), reduce smoke and soot. When used properly these wicks are virtually self-trimming. Can be used in virtually any application. Each wick has been cut to the specified length, primed with a high melt point wax (212°F) and has been crimped with a 20mm diameter x 10mm tall tab.</p>	LX-8	2.5"	\$8.10

WOOD WICKS	Size	Price (Bag of 12)	Price (Bag of 100)	Price Breaks
Wooden wicks are for use in containers, and should not be used in pillars or votives. Wooden wicks can be used in paraffin or soy. When using our wooden wicks in pure soy, we recommend using the large or extra large wick, to ensure the melt pool is wide enough since pure soy wax tends to hold in the heat, as well as fragrance. Not recommended for palm wax, beeswax, or coconut wax.	X-SMALL	\$3.75	\$20.24	2-3 bg12: \$3.38 ea 4+ bg12: \$3.19 ea
